Important Notes（only for using the firmware update package)

1. After the device has automatically updated, please **pull down the settings menu**, locate "**About**", and check if the "**System Version**" is **Tarsier_3.1 userdebug**, and the "**App Version**" is **3.1.3**. If confirmed, the upgrade has been successful.

2. After a successful upgrade, please **back up any important data** on the device to ensure it is safely stored.

3. Please be sure to click on "**Initialize Device**", as the system will complete the final adjustments. Failure to do so may result in system crashes.

Note: Please ensure that you back up all important data on the device before clicking on "Initialize Device" to avoid data loss.
